# what is erc 721 token standard?

The ERC-721 token standard is a technical specification for non-fungible tokens (NFTs) on the Ethereum blockchain. Developed by William Entriken, Dieter Shirley, Jacob Evans, and Nastassia Sachs in 2018, ERC-721 introduced a unique token standard that revolutionized the representation and ownership of digital assets. LBM Solutions is the leading Crypto Token Development Company serving worldwide.

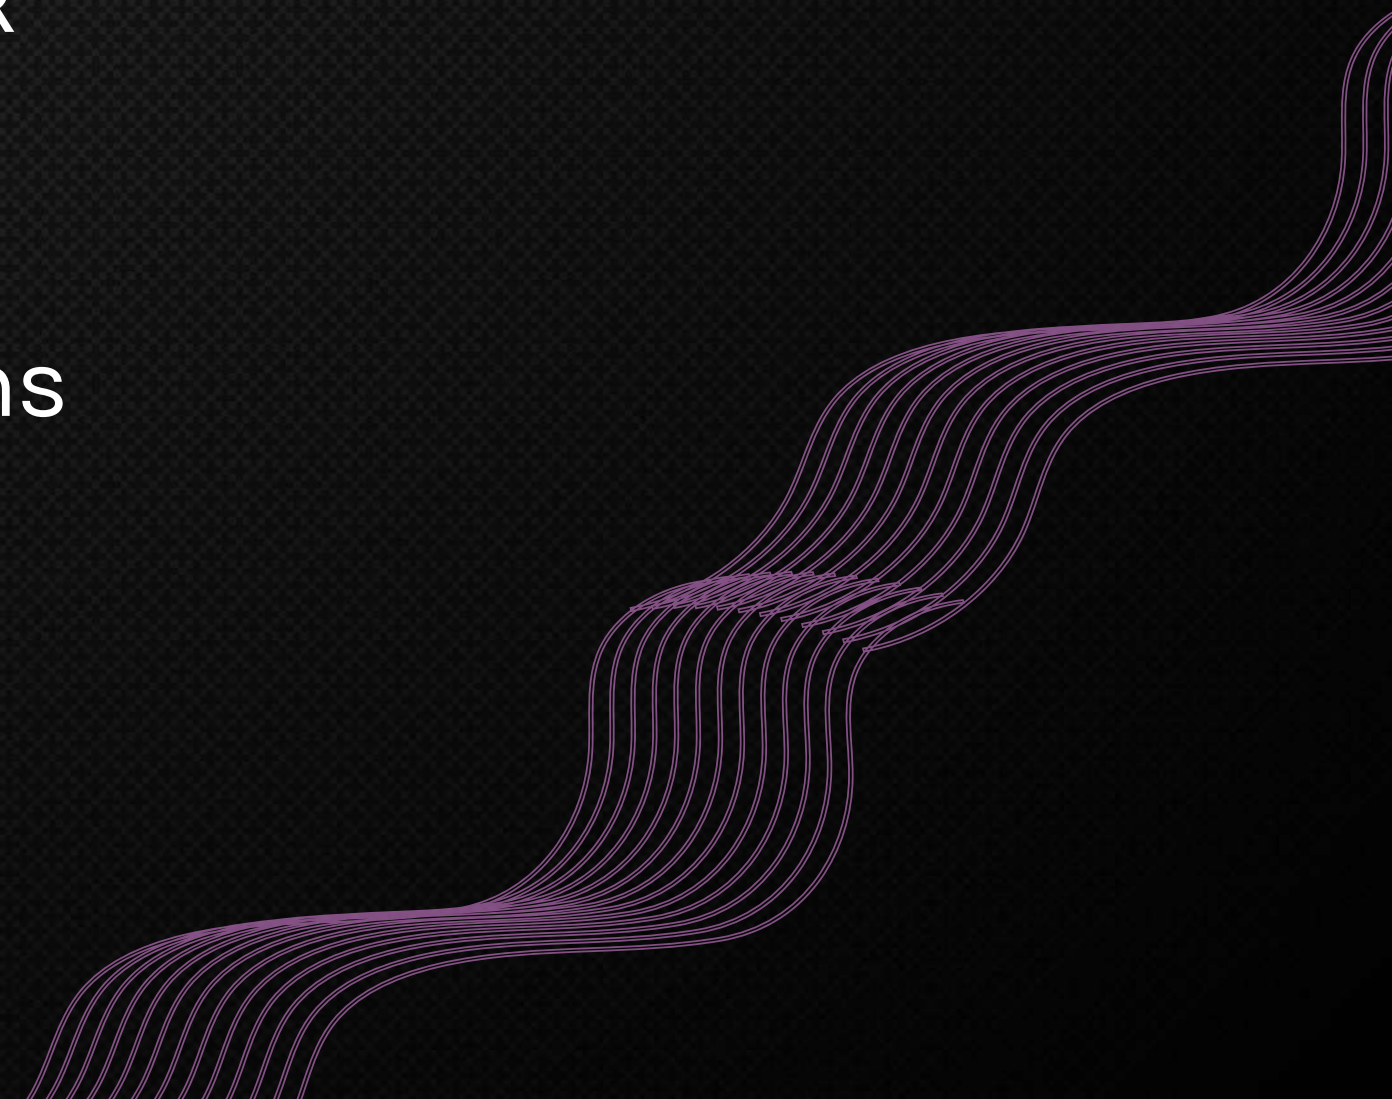

# What are Equity Tokens?

Equity tokens are a type of digital asset that represents ownership of a company. These tokens are created using blockchain technology, which provides a secure and transparent way to track ownership and transfer of the tokens.

Unlike traditional stocks, however, equity tokens are issued and traded on a blockchain, making them more secure, transparent, and easily transferable.
